

*The oil has a nice, natural smell and color. It's very gentle and light. When I apply the oil, it's as if I hadn't put anything foreign on my skin—it's like my own skin. When I use it early in the morning, it stays throughout the day and overnight. Also, I like the dropper. It's safer and healthier.*

**Sahar**

*The oil feels soft and silky. I noticed that after applying it over the course of three days, the aging spots on my hands became lighter and lighter and eventually vanished. I also applied it to a scar with a similar result. To me, the oil has an earthy, "forest" smell.*

**Luba**

*It helped my dry skin feel softer on my hands. It helped my son with his eczema. His girlfriend said it is good quality with a nice aroma and well priced for its quality. It has easy application.*

**Paul, M.D.**

*I love this oil. I have only been using it at night but I love the smooth, silky feel and know it makes my skin feel healthy and vibrant. My skin absorbs the oil during the night and it feels wonderful in the morning.*

**Mary**
